ACCESSORIES Line

brief history

Phonocar Accessories Line was born in 1972 to provide installers with all the necessary components for setting up customised HI-FI systems.

Since then, Phonocar has increasingly expanded its portfolio until today, being able to match all infotainment requests.

today

Since the introduction of MULTIMEDIA SYSTEMS, the Accessories Line has focused on the installation and/or replacement of the original on-board system.

Today it includes ABS 1 and 2 DIN **Car Radio Adapters** of various colours and types for perfect aesthetic performances.

But also electric and electronic items such as **Cables** and **Interfaces** to establish connections to the main system or for restoring facilities (feeds and steering wheel control).

The wide line of **Loudspeaker Adapters** is dedicated to the installation of LOUDSPEAKERS in car doors, parcel shelves and dashboards.

Of course, the catalogue also includes **Antennas** and **Rods**, all **Electrical Accessories** (fuses and fuse holders, terminals, insulating, filters, switches etc.) **Tyre Pressure Sensors** (control and safety devices for trucks and lorries), **Parking Sensors** (kit for front or rear bumpers), as well as everything needed for **Interior fittings** (carpet, spray glue, cloths and grilles for loudspeakers, etc.).

specific lines

CARE&GO!

The brand new line of products for passenger compartment sanitisation and safety that includes anti Covid 19 devices, air and surface sanitisers, and the Baby Seat Alarm (the practical wireless car seat alarm).

SMARTREP

The innovative adhesive film for removing scratches from alloy rims available in 19 metallic and matt colours.

POWERCABLE interconnection **SPEAKERCABLE** interconnection **AUDIO 9line** INTERCONNECTION

HI-FI CABLES with high conductivity and extremely flexible.

This section is divided by **CAR MAKERS** and makes it easy not only to find all our products matching one or more car brands, but also to check for which car models each item is suitable.

The search is user-friendly, thanks to the **4 MACRO CATEGORIES** always listed in the same order:

ADAPTERS

Everything you need for the installation or replacement of Car Radios, Multimedia Systems and Loudspeakers on vehicles.

• ADAPTERS FOR CAR RADIO COMPARTMENT

Commonly referred to as "frames". Thanks to these adapters you will replace the car radio or on-board system, without changing the original aesthetics of the dashboard.

• ANTENNA CABLE ADAPTERS

Complementary to the car radio adapters, these adapters are also needed for connecting the new car radio or the new multimedia system to the original car system.

• LOUDSPEAKER ADAPTERS

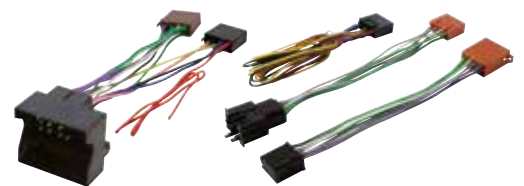

These adapters are the necessary supports for the installation and/or replacement of the loudspeakers in the doors, in parcel shelves and on dashboards.

CABLES

All types of cables, divided by function and use:

- CAR RADIO ISO CABLES
- HANDS-FREE KIT ISO CABLES
- LOUDSPEAKER ISO CABLES
- KITS
- AUX-IN AUDIO CABLES

AUDIO INTERFACES

Interfaces for specific audio ports:

- USB AND AUX-IN INTERFACES ON CD-CHANGER PORT
- INTERFACES FOR RESTORING USB PORT AND AUX-IN JACK 3.5

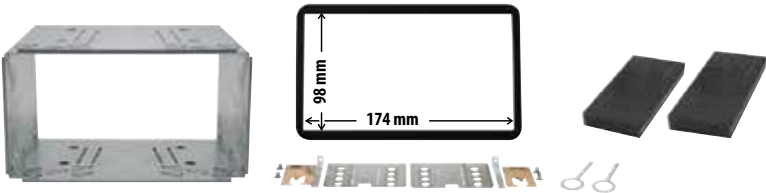

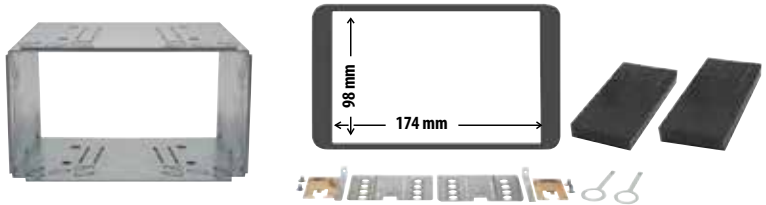

CAN BUS INTERFACES

Section dedicated to interfaces restoring main functions and feeds:

- STEERING WHEEL CONTROL INTERFACES
- FEEDS INTERFACES
- VIDEO UNLOCK INTERFACES

TYRE MONITORING KIT pressure + temperature for MEDIASTATION

4 SENSORS + button

This monitoring system displays tyre pressure and temperature on the car's multimedia system by simply pressing a button.

The system signals any critical conditions in red and with an acoustic alarm:

- pressure too low below 1.7 bar
- pressure too high above 3.3 Bar
- temperature above 80°C.

The sensors are connected wirelessly.

The display is attached to the dashboard with double-sided adhesive tape and is powered by the solar panel on the top.

MONITOR

For installing the kit, check that the monitor is equipped with a video input.

REAR CAMERA

Thanks to the supplied control unit, you can install the system even with rear cameras.

Included:

- 4 tyre sensors with standard valve
- 1 control unit
- 1 button

AIR PURIFIER

with HEPA FILTER

**THE AIR IS FILTERED AND
PURIFIED FOR AN OPTIMAL
CONCENTRATION OF
ANIONS**

Purifier with high-efficiency HEPA filter that detects the quality of the air in the passenger compartment, purifies it and returns it with an optimal level of anions.

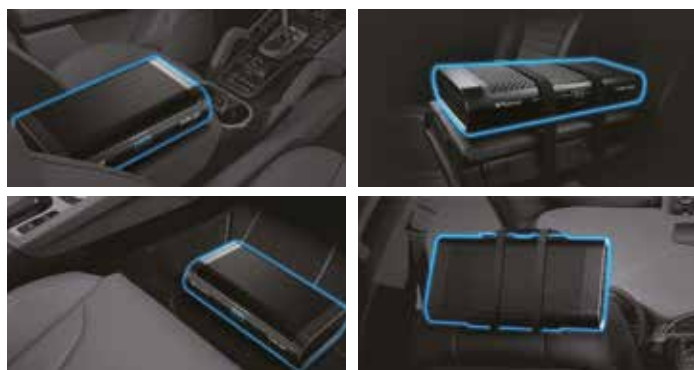

Harmful particles are removed thanks to 3-level filtration, which is effective against: **viruses, bacteria, dust mites, allergens such as pollen and dust, smog, harmful gases, cigarette smoke and particulate matter (PM2.5).**

4 operating modes:

- Low speed
- Medium speed
- High speed
- Automatic
automatic adjustment of fan speed and airflow ensuring clean, allergen-free air.

- NOISELESS
- NO LIQUIDS
- LED AIR QUALITY INDICATOR
- 3 FILTRATION LEVELS
- AUTOMATIC MODE
- QUICK AND EASY FILTER REPLACEMENT
- IDEAL FOR ALLERGY AND ASTHMA SUFFERERS

The Purifier can be easily placed in the passenger compartment and is equipped with a practical holder for installation behind the headrest or on the armrest.

TECHNICAL FEATURES

04971 IONISER with HEPA FILTER

Smart Vehicle Ioniser that effectively **purifies the air** in the passenger compartment, making it free of allergens, harmful micro-organisms and harmful gases.

**FOR REMOVING
Microorganisms,
Particulate matter (PM2.5),
Pollen, Smog, Dust**

The air is purified **WITHOUT USING LIQUIDS**, but thanks to the HEPA H13 filter and thanks to the ionisation of the gases it contains.

Noiseless and useful to **remove unpleasant odours** such as cigarette smoke.

Perfect to protect the health of passengers suffering from allergies to pollen and for people carrying pets in their vehicles.

Viruses, bacteria, pollen, mites, etc. are odourless and invisible to the human eye but float in the air and can be the cause of allergies and/or respiratory diseases.

Purifying the air, especially in tight, closed environments, is important for adults' and children's health.

Easy application for scratches needing
more strips

HOW TO APPLY IT?

3 easy steps

1. Find the scratch
2. Clean and dry the surrounding surface
3. Apply SMARTREP

Maintenance and Warnings

- For optimal adhesion of SMARTREP it is important to wait at least 48 hours after application before washing the car;
- If using a high-pressure wash, keep the nozzle at least 1 metre away.
- Traces of wax may form around the edges of the backing, in which case gently clean the edges with a cotton ball soaked in water and a mild detergent.

The product can be washed using specific products for car bodies. Keep out of reach of children. Keep away from excessive heat sources. The minimum application temperature is 4°C. For best results the temperature of the product and the surface to be repaired must be 10°C or higher.

19 COLOURS
