POWER LED BULBS

LED | PARABOLIC REFLECTOR HEADLIGHTS | 12V

★ Power, reliability, and innovation

With the new TORNADO LED bulbs, we've combined the best of Vortex and Quick Change technologies, creating a light that faithfully replicates the glow of traditional halogen bulbs, but with significantly higher brightness and a wider, more precise beam.

The integrated cooling fan and the new chipset positioning ensure constant performance and maximum reliability.

Thanks to quick Plug & Play installation and advanced CAN-BUS compatibility, the TORNADO bulbs are the ideal solution to upgrade any vehicle's old lights.

POWER COOLING

High luminous power with a sharp, accurate light cut-off.

Smart micro fan built into the lamp body for optimal cooling.

HIGH CAN-BUS COMPATIBILITY

Advanced CAN-BUS compatibility: say goodbye to false "bulb out" warnings. If warnings still appear, optional interfaces are available.

PLUG&PLAY INSTALLATION

The bulbs fit perfectly into reflector headlights without the need for external adapters or modifications.
